

Glass mesh 112

35.011, 35.014

Applications Surface reinforcement for planking LEMIX clayboard CLAYTEC 09.014 and 09.015.

Composition Gauze made of glass fibre yarn/roving, enhanced with polymer finishing for scrim. Weight approx. 112 g/m², warp/weft approx. 16/15 fibres per 10 cm, mesh size approx. 5.0 x 5.5 mm

Form of delivery On rolls, in surface reinforcement; width 100 cm, length 100 m (35.011) and 35 m (35.014).

Storage Can be stored for at least three years if kept dry, well-ventilated and protected against direct sunlight.

Amount required Surface reinforcement: equal to m² plaster surface plus an additional 10–20% extra for waste and overlapping.

Method of use The mesh is laid on the mortar while it is still freshly applied and plastic, and rubbed in with a smoothing board. Approx. 10 cm overlap must be provided in areas around joints.
